

BUILDING SECURITY

SOLUTIONS

INTERACTIVE BUILDINGS WITH IP INTERCOM AND SPEAKERS

When you add IP intercom and speakers to your building, your building becomes interactive. Security guards can talk to people they see on the video system instantly, regardless of distance. If the person is lost or simply needs assistance, it is easy for the people in charge to communicate directly. On the other hand, if a person has ill intent, security guards can interact and prevent an unwanted situation to develop. By combining audio, access control and cameras you get the ability to see, speak and listen. STENTOFON makes it simple to welcome, guide, help or warn people anywhere in the building or on the premises.

- **Would you depend on a security system that cannot talk and listen?**
- **Have you ever been stuck in an elevator without being able to communicate?**
- **Have you ever visited a company with a closed door and no IP intercom?**

WHY STENTOFON?

The STENTOFON critical communication portfolio offers state of the art quality audio software and hardware. Just press a button and you can call for immediate assistance, help and support. The voice in the other end can be heard loud and clear, thus eliminating misunderstandings or misinterpretations. Even in very noisy environments we offer crystal clear audio - driven by our Turbine stations with 10Watt amplifiers and active noise cancellation software included. Our quality products are built to last with backwards compatibility; this reduces the cost of ownership.

EVACUATION ZONES WITH INTERCOM

Easily identify and quickly dispatch help for those that are unable to evacuate due to inoperative elevators.

STAFF ENTRANCE/SIDE DOORS

Card reader for door opening and Intercom with CCTV provides secure and easy access on the premises.

Direct communication line to security guard on patrol.

OUR SUGGESTIONS

CONTROL ROOM MASTER

- IP Flush Master Display (1008031000)
- IP DAK-48 Unit (1008010100)
- Handset for IP Flush Master (1008097100)
- CRM V license (1009648001)
- Ideal for Control Rooms
- Up to 52 programmable Direct Access Keys (DAK)
- Integrated managed data switch providing advanced networking and security features

IP DUAL DISPLAY (1008007000)

- Ideal for receptionists and guards
- Direct access to address book and function keys (Door opening...)
- Crystal clear audio quality
- Supplementary equipment:
Microphone for Dual Display Station (1007007010)

TURBINE TCIS-2 (1008111020)

- Ideal as intercom at doors, gates and barriers
- Universal design adapted for people with disabilities
- Extreme robustness

TURBINE TCIS-6 (1008111060)

- Ideal for Door opening
- OLED display with address book

EXIGO IP HORN SPEAKER

- Ideal to respond to security incidents
- Group announcements

PARTNERSHIP AND LOCAL SUPPORT

STENTOFON has established a worldwide network of partners. We are represented in more than 60 countries. Our partners have participated in STENTOFON training and sales programs to offer you the best support and service in the industry.

ABOUT STENTOFON

STENTOFON dates its origin back to 1946 as Stentor Radiofabrikk. Stentor later extended its range with intercom systems sold under the brand name of STENTOFON. STENTOFON solutions are voice driven, because we know that when people are in need for assistance they call out, they listen and they start to communicate.

Today we offer a wide range of products and solutions that integrates intercom with building management systems. A STENTOFON audio solution adds the capability to welcome, guide, help or warn people present anywhere on the premises.
